

## Excel Examples: Macros

1. In the file **[19-MC.xlsx ]** create sheets named “Revenues”, “Expenses”, and “Balance”.  
Record a macro named “ChangeToBalance” that allows changing from sheet “Revenues” to “Balance”
2. Insert a button on sheets “Revenues” and “Expenses” and associate the button to the “ChangeToBalance” macro
3. Record a macro named “FormatCell1” that formats the selected cells as following:
  - Font: Times New Roman; size 14; Bold, Italic, red
  - Fill: yellow
  - Limits: double line, dark blue
4. Delete the macro “FormataCell1”
5. Consider the sheet **[19-MC.xlsx | Exmp05]**. Record a macro to automatise the execution of an advanced filter with only one criterium and associate that macro to a button
