

Excel Exercises: Table operations

1. Consider the file "Producao.txt"
 - 1.1. Import the content to **[14-OST.xlsx | Ex01]**, converting it into a table with several columns (identified by the file's first row)
 - 1.2. Sort the table by "Sector" and "Tipo"
 - 1.3. Remove the duplicates
 - 1.4. Copy the values to a new sheet
 - 1.5. Format the necessary columns as date, time and currency
 - 1.6. Apply subtotals to view, simultaneously, by "Sector":
 - The average of "Tempo paragem"
 - The sum of "Custo reparação"
