

## Excel Exercises: Cell editing and manipulation

## Consider the table [02\_EDC.xlsx | Ex01]

1. Format it to obtain a result similar to the one presented in the picture below:

- 2. Apply a conditional formatting to the "Stock" column to highlight the products with stock inferior to 10
- 3. Apply a conditional formatting to the column "Última compra" (meaning: last purchase) that identifies the products bought in the 1st trimester of 2010
- 4. Insert a new sheet named "Backup"
- 5. Copy to the new sheet only the table values
- 6. Copy to the new sheet only the header formatting
