Excel exercises: Text and information functions

Consider the sheet **[10-FTI.xls | Ex01]**. Using text functions and information functions:

1. Column "Referência Interna" (meaning: internal reference) should contain a reference to each product in the format "XXX0000" where:
    *   "XXX" is the first 3 letters of the product's name. The letters should be in caps
    *   "0000" is a 4-number digit based on "número de ordem"

2. On the column "Preço Venda" (meaning: sale price) determine the value 20% over the cost price ("Preço custo")

3. On the column "Informação" (meaning: information) one of the following messages should be presented:
    *   "Ok" if "Preço Venda" has a valid numerical value
    *   "Atenção! Erro!" if "Preço Venda" does not have a valid numerical value
